832 Sq. Ft. Bungalow. This would make a perfect cabin/cottage at the lake. Very simple and cost effective to build. This plan may be small, but it has everything you'll need. The kitchen/nook area is open to the living room. These rooms are nice and bright because of the double garden doors and windows in the living room. The bathroom is located off the kitchen and is accessible from the bedroom. The 3-piece bath also features a 60"x36" walk-in shower. The spacious front entry also leads to the attached garage. The laundry room has a closet, upper and lower cabinets, including a laundry sink. Also a 2-piece bath is in this room. The mechanical room is located in the garage for better accessibility. The patios in the front and rear are both covered.
