1217 Sq. Ft. Bungalow. A perfect plan for those narrow lots. All the rooms are a nice size for the square footage of this home. Enter from the covered veranda right into the living room. The living room features a gas fireplace and a railing by the basement stairs. The dining area has a bay window and is open to the living room and to the U-shaped kitchen. The master bedroom features a 3-piece ensuite and a walk-in closet. From the master bedroom you can access a small deck in the rear. The spare bedroom is a good size also. The basement has been left undeveloped so you can design it the way you would like. A great and economical plan to build.
