**1066 Sq. Ft. Bungalow.** Great looking home and floor plan. This is a simple design therefore it is also a cost effective home to build. It could easily be made into a Two Bedroom Plan. The "L" shaped kitchen has room for all appliances and also has a built-in pantry. The living room is a nice size. It even has room for a future fireplace, etc. The three piece bathroom also features space for a washer & dryer. All three bedrooms are a good size for this type of home. The open staircase in the dinette area leads to the full basement. The basement is undeveloped, so you could design it just the way you would like. Lots of room for more options here.
