Bungalow with Rear Garage: Great plan for a corner lot with the garage off the side. The garage doors could also be put at the rear for a standard lot with a back alley. A good starter size home. The kitchen features room for all the major appliances. The living room has two large windows. Off the three-piece bath are the three bedrooms. There is a railing along the stairwell to the basement. The two car garage has two windows, a man door, and a 16'x8' overhead door. The basement is undeveloped except for the mechanical room, so lots of options here.
