Bungalow with Rear Angled Garage. This plan has 1920 Sq. Ft. all on one floor at ground level. The perfect plan for a large corner lot or for an acreage. From the large front entry you pass by two french sliding doors that lead into the dining room. On to the "U" shaped kitchen which has a working island and a walk-in pantry. The great room has large windows and two doors leading to the deck in the rear and the side yard. This room is also vaulted. The laundry room is conveniently located in the center of the house across from a bedroom and a 3-piece bath. Another bedroom is next to the master bedroom. The master features a walk-in closet and a 4-piece ensuite including a spa tub. A 2-piece bath is located next to the garage entry. The garage is a large single car with plenty of extra space and a 12 foot wide door. This plan is on a 4 foot crawl space. The access to this area is in the laundry room. Lots of appeal from the inside to the outside.
