Bungalow with 3-Car Garage: This three bedroom bungalow has loads of room. The main foyer with its 13'-6" high ceiling leads you into the openness of this plan. The great room is vaulted and has a 2-sided fireplace between it and the dining room. From the dining area you can access the large rear cover deck. Check out the large country style kitchen with a corner walk-in pantry and working island with a lunch bar. From the kitchen, there is a mudroom area with the laundry room at one end, and down a couple of steps, you have access to the outside or the large 3-car garage. The overhead doors in the garage are 8 feet high. Back in the house we go to the master bedroom where you will find another gas fireplace and a french door leading out to the rear deck. The 4-piece ensuite has a tub and a 48" shower. The large walk-in closet has lots of room for him and her. There is a 3-piece bath in between the other two bedrooms, which are also a very nice size. The basement is undeveloped except for the mechanical room. You can design it just the way you want in the future, or have E-Designs Plans Inc. design it for you. This house would look great on any street or in the country.
