Bungalow with 2-Car Side Garage. The front of this bungalow has a huge deck that wraps around the side to the main entry, as well as a rear deck. Enter double doors from the front deck into the living room area, which is vaulted. It has a fireplace for those cooler nights. The dining room is open to the "L" shaped kitchen, which has a walk-in pantry and huge island with eating bar. Exit the kitchen area to the rear deck. If you enter from the attached garage, there is a huge entry with closet, leading into the office, which has a sliding door between it and the kitchen. The master bedroom is on the front of the house, and also has double doors leading out to the front deck. It has its own walk-in closet and 5-piece ensuite with corner tub. There are two more bedrooms on this level, main floor laundry, and a 3-piece bathroom. The basement is unfinished, however, if you need more space, there are lots of options for design here. The garage has two 10'x8' overhead doors. A great bungalow plan for the farm or acreage.
