Bungalow with Side 2-Car Garage. A 3-bedroom design on the main floor with the master suite having a 4-piece ensuite including a custom shower, and its own walk-in closet. A french door leads from the master bedroom to a small covered area on the rear deck. The other two bedrooms each have their own walk-in closets as well. Treyed ceilings in the master bedroom, dining room, and great room provide a unique design inside. A 2-way gas fireplace separates the great room and dining room. Just off the great room is 2 french doors leading into a covered porch, which is completely enclosed. Continue through the porch to the large open rear deck. The laundry room is just inside the 2-car attached garage and off the U-shaped kitchen, which has a corner sink and small island. The front entrance has large pillars bordering the covered veranda. The basement is undeveloped so there is lots of room to design some additional living space here.
