Veranda:

Yes (Covered)

Main Floor Laundry: No

Attached Garage:

No

Walk-in Pantry: No

Finished Basement Plan:

Yes (Walkout)

Office/Den: No

1728 Sq. Ft. Cottage. Lots of square footage for a small Cottage. Each floor has 576 sq. ft. This cabin plan is designed to have walkout basement so building into a side of a hill overlooking the lake would be perfect. The plan can also be built without the walkout by building on concrete slab. With three bedrooms and room in the lower level for more bedrooms, there is room for everyone to stay. The master bedroom has large windows and a garden door going out to the covered deck. What a perfect way to start the morning! The upper level has storage space on both sides of the bedrooms. The main floor is set up nicely to take advantage of the view from the large front windows. Enjoy your morning coffee on the covered front deck of the living room. The lower level could be adapted to have a overhead door for parking vehicles, boats, etc. This is an all around nice plan inside and out.
