 Fireplace: No  
 Deck(s): Front (Covered)  
 Veranda(s)/Patio(s): Sides & Front (Covered)  
 Attached Garage: Yes (1-Car with 10'x7' Doors)

**2-Storey Cabin Plan with Garage/Workshop.** This design would be great for the cottage or lake lot. The main floor has a single car garage with additional room to work, plus a half bath on this level. The utility room is also located on the lower floor. It has a separate workshop with double doors on either end that would also work great to store those lake toys. All entrances to the lower level are covered, and there is a full patio area under the upstairs deck. Up the stairs from the main entry is the living quarters on the second floor. There are two bedrooms on this level, the master having its own ensuite and walk-in closet. Laundry is accommodated on this level as well. A walk-through kitchen runs into the dining room and family room, which are open. These rooms are vaulted, and the vault runs right out to the front deck as well. Lots of room for a barbecue and some patio furniture out there. Your home away from home!
